Unit (SPMU)

ABOUT THESE MAPS...

These maps are derived from various sources layered within an administrative Block boundary. These maps are *indicative* and carry small errors that may crop up for various reasons. These maps are intended for the purpose of overall planning for the Intensive Block of the Jharkhand High Impact Mega Watershed Project.

The watersheds and their overlap with the revenue village boundaries, approximate location of various habitations etc., can be viewed while planning. The Gram Panchayat boundaries are not yet available, and hence not included. Watershed boundaries may need some realignment in some cases.

Using the Maps in GIS:

These maps and their *kml* files will be made available to the CSOs to enable them to view these layers as per their requirement in Google Earth. This will also be useful to identify the focus areas (tolas/ villages/ GPs) where Google Earth *images* can be saved and used for participatory resource mapping exercises. WASSAN will orient the teams on using these maps in Google Earth in due course.

The project website will have all the layers and we intend to add more layers (like water bodies) in due course.

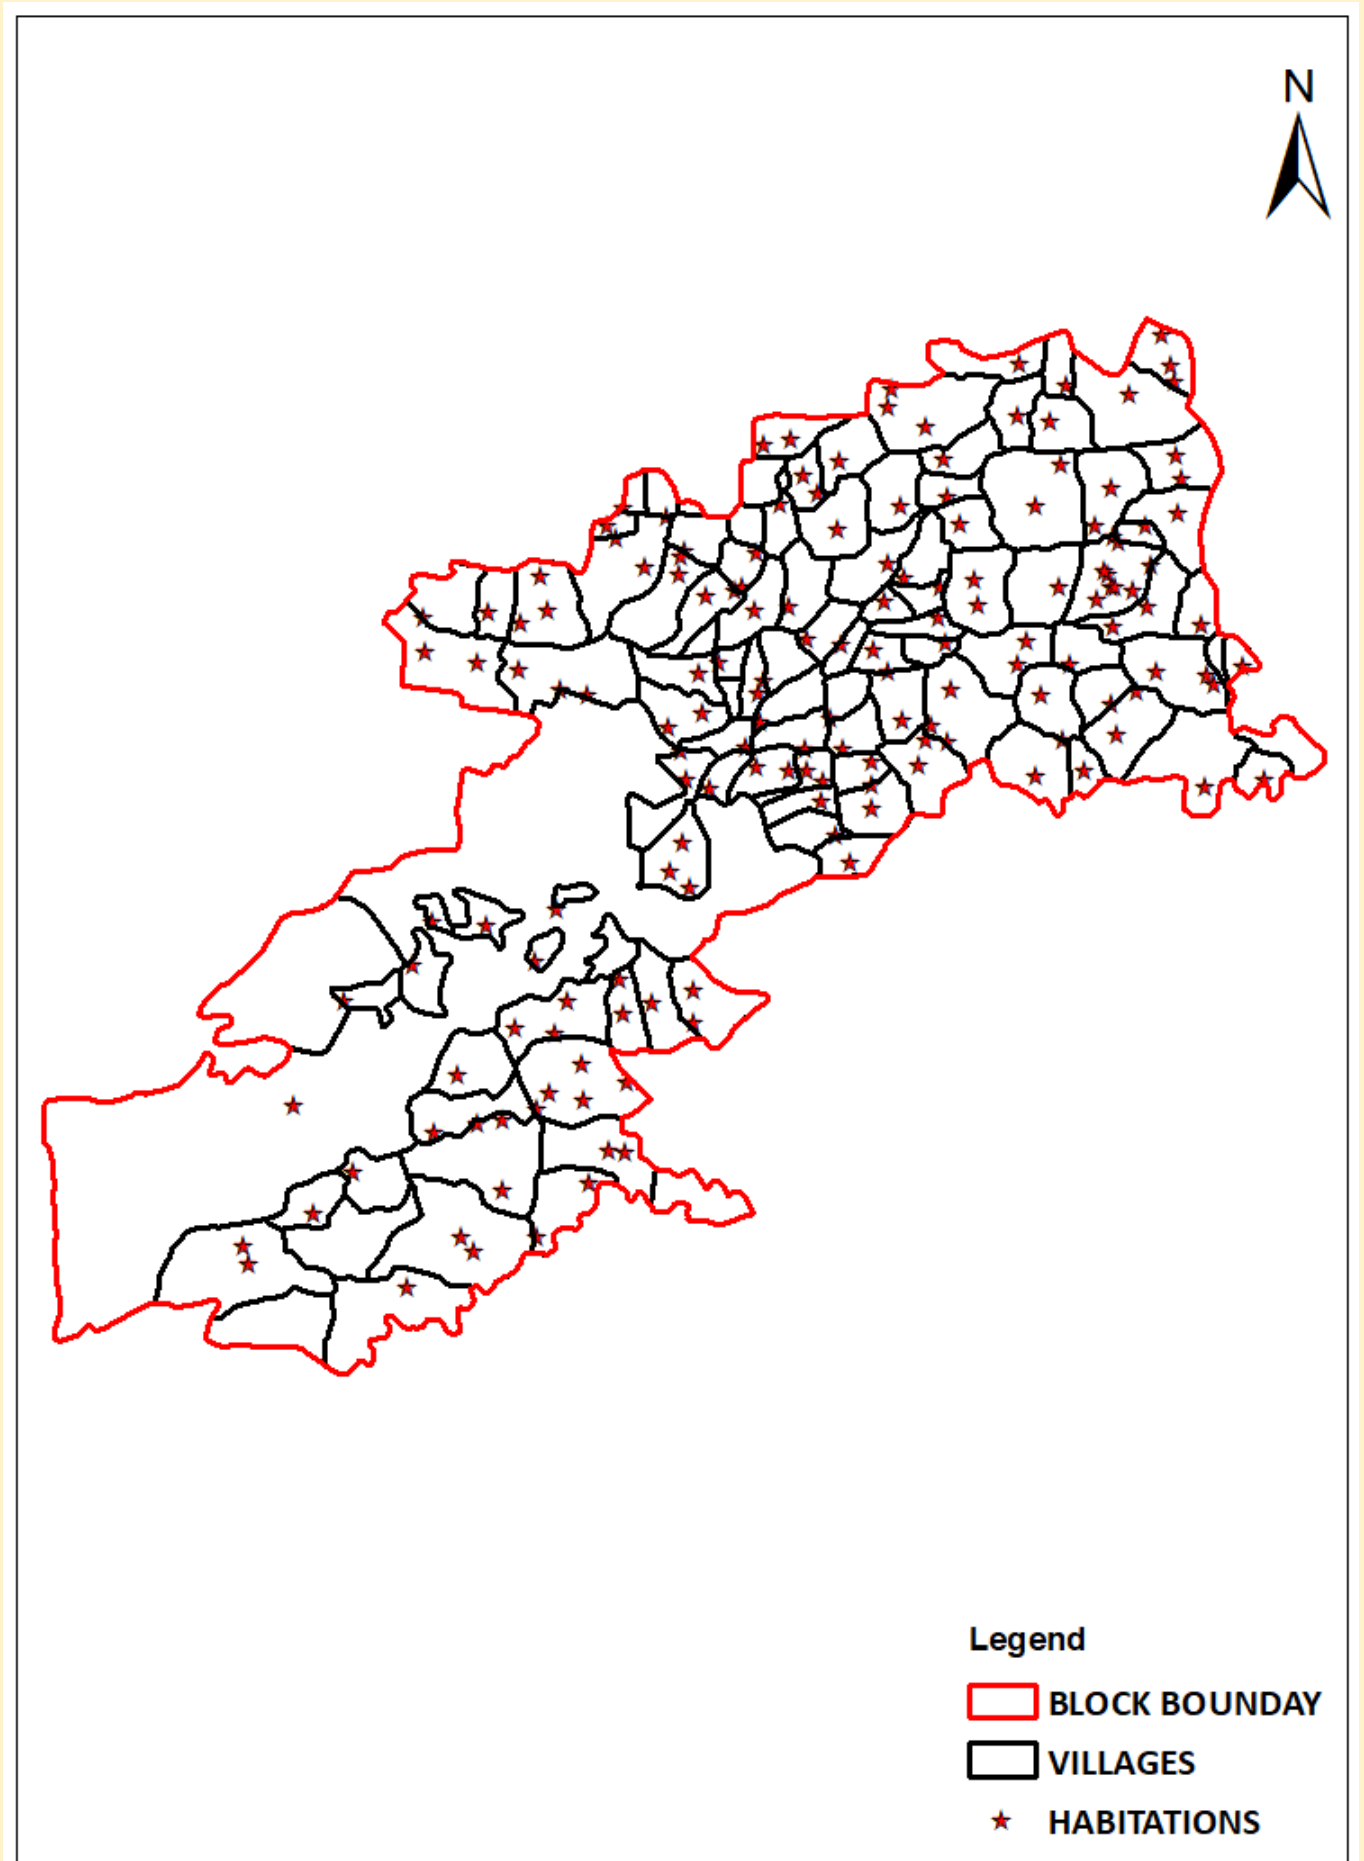

Data Sources:

- Village names of villages (boundaries): 2001 census
- Watershed Boundaries and Drainage lines: Derived from ALOS Palsar (12.5 m resolution) Digital Elevation Model.
- Forest area: Reserve forest area digitised from Toposheet (1:50000)
- Star marked habitations digitised from the toposheet

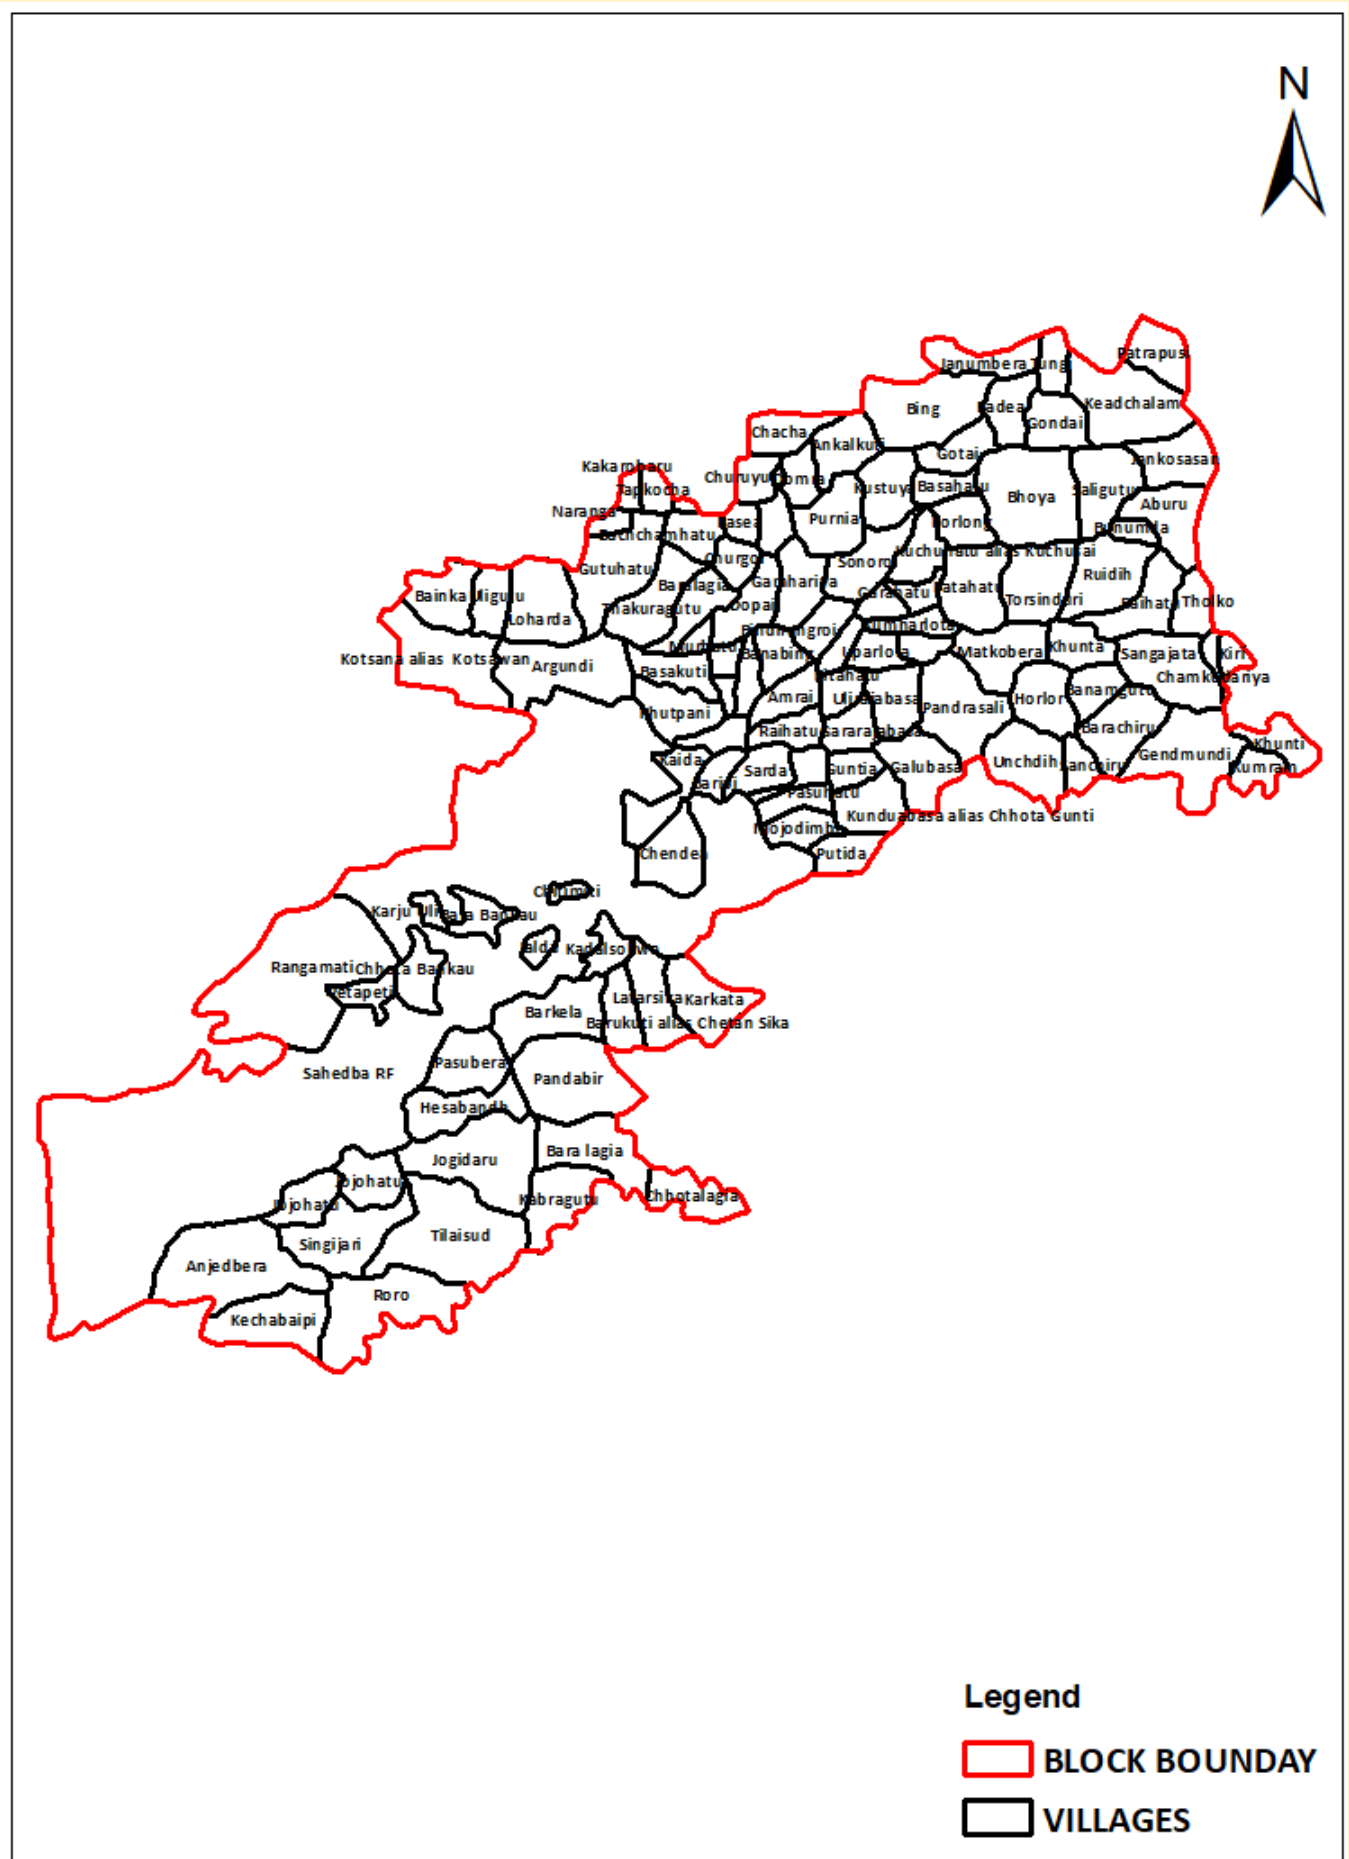

State Project Management Unit (SPMU)

VILLAGES AND HABITATIONS

BLOCK BOUNDARY AND VILLAGES

MICRO-WATERSHEDS, VILLAGES AND DRAINAGE LINES

Legend

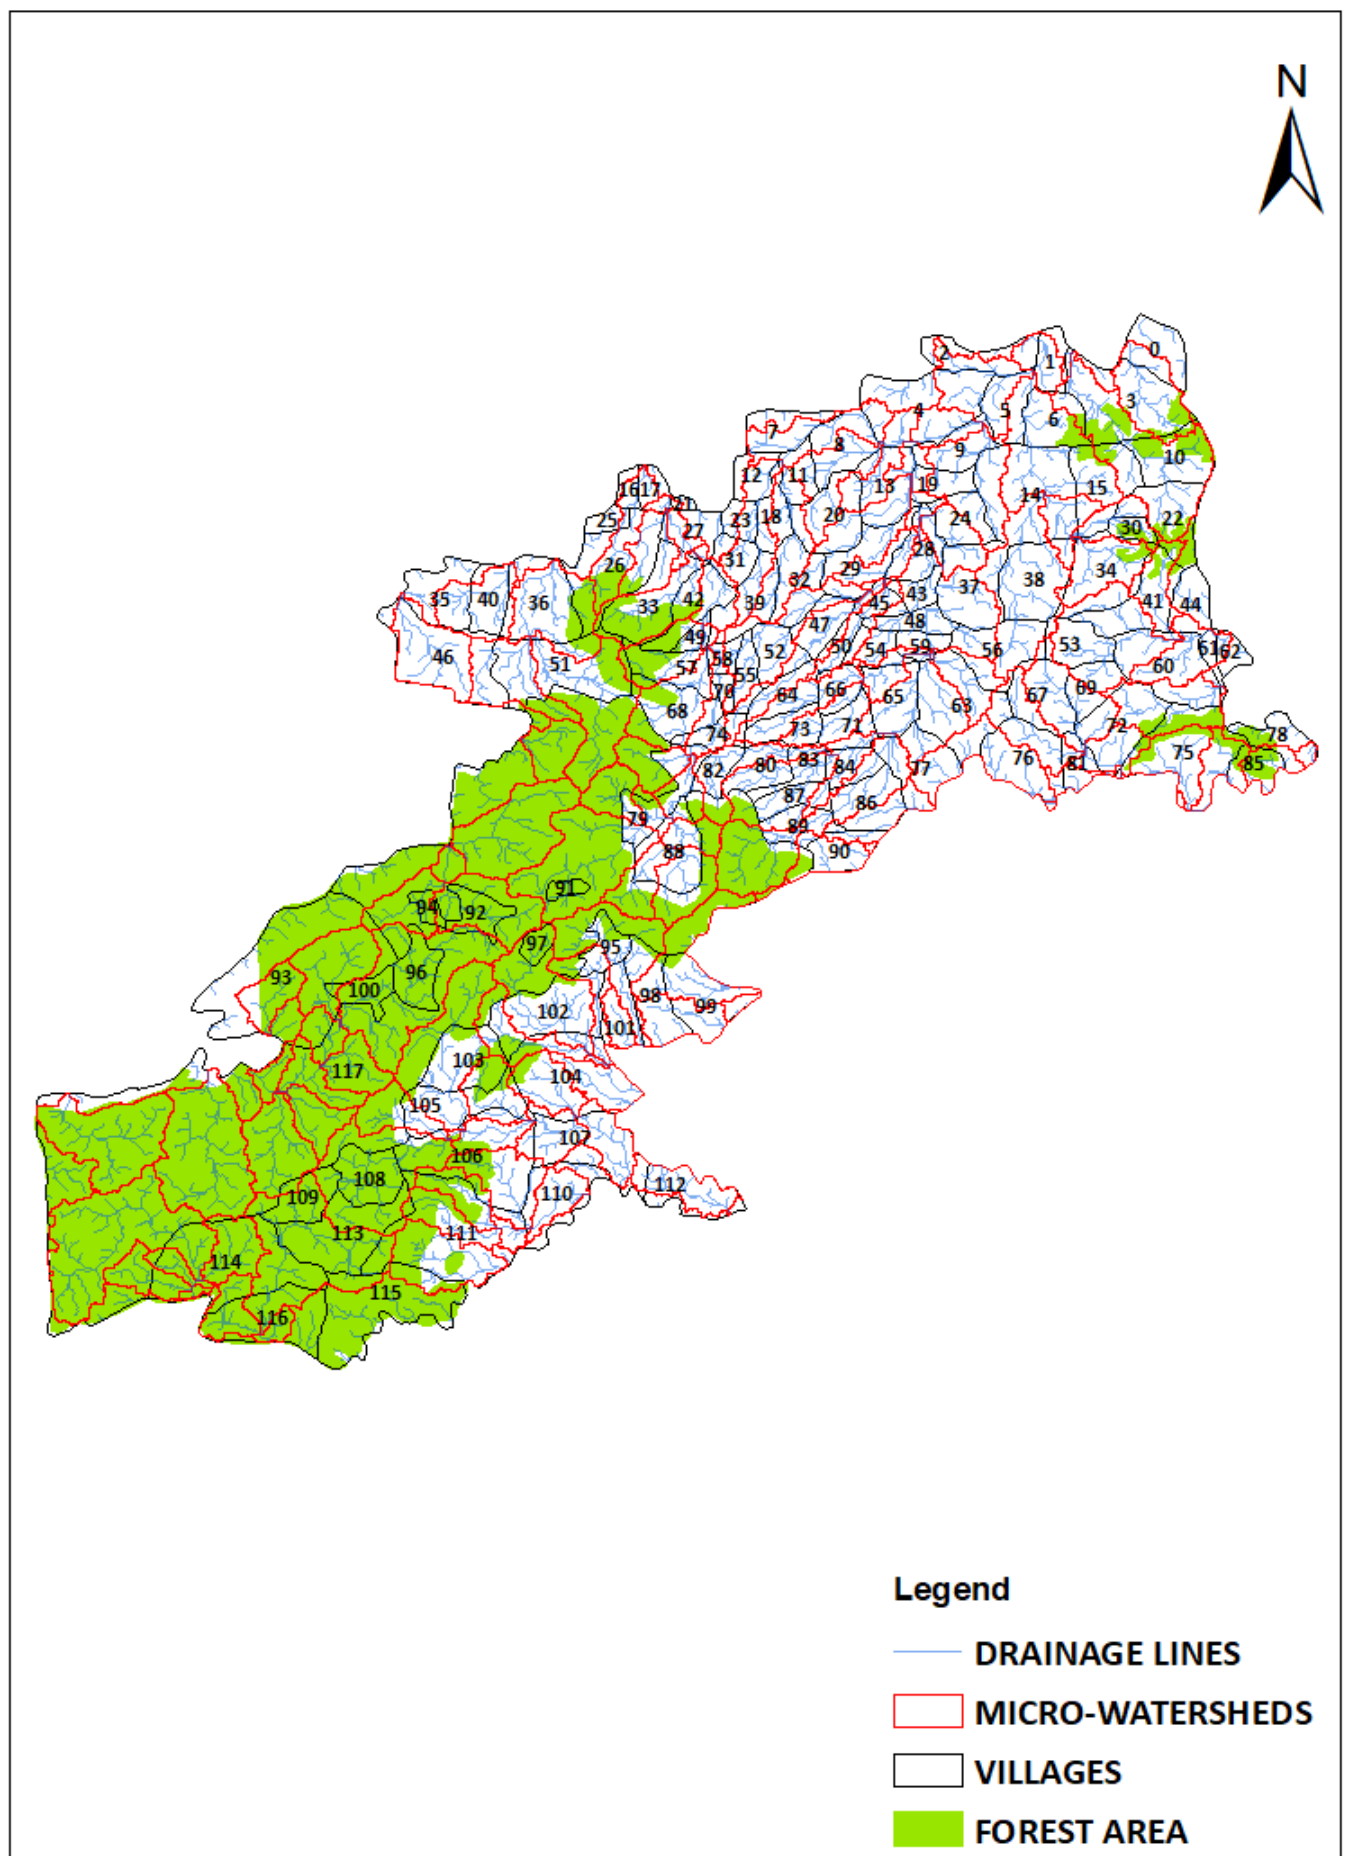

-  MICRO-WATERSHEDS
-  VILLAGES
-  DRAINAGE LINES
